

Bending & Cutting Solution

2021

In Franciacorta

In the highly industrialized and productive Lombardia lies the “Franciacorta”. An amazing strip of land with breathtaking views: hills, vineyards and Lake Iseo in the background make of Franciacorta a magic place.

VISION

Here lies Warcom, a family business with advanced technology and great history. The company is one of the Italian market leaders for press brakes, guillotine shears, plasma cutting machines and fiber laser cutting machines. Warcom has always made customer care one of its targets.

MISSION

Warcom has always tried to provide the best possible solutions for industrialized carpentry. Through quality, durability and the pride for the “Made in Italy” Warcom has an eye focused to foreign markets, increasing its sales abroad.

Since **1959**

Made in Italy

In 1959 Giovanni Robazza built the first mechanical shear in cast iron under the "ROMEA" brand and, from his small workshop, he started the production of machine tools for sheet metal working.

In 1979 Walter Roberto Robazza, Giovanni's son, founded Warcom Spa, industrializing the production of hydraulic press brakes and shears with CNC numeric controls.

Warcom

The Company

In its 5.000 m² of production, plus around 1.000 m² of offices, Warcom can manufacture approximately 100 machines per year, divided between press brakes, fiber lasers, plasma cutting machines and guillotine shears.

Warcom machines are present in 47 different countries.

Production

All mechanical procedures are overseen by our technical office with 3D programs and on state-of-the-art machinery with numeric control, to obtain the most precise outcomes possible.

Only a minimum of working procedures are done outside Warcom, which has the structure, the capability and the experience to make them in its own workshop. Boring, milling, welding, sandblasting, painting and assembling areas are always fully operational.

Fiber Laser

W-FIBER

W-Fiber fiber laser cutting system in its new 2020 edition.
A new fantastic design and improved performances.
Now with 210 m/min interpolated axes and new HMI.
Available up to 2.5x12 meters and up to 12kW.
Both Trumpf TruDisk and IPG sources are available.

FIBERLASER COLLECTION

Fiber Laser

W-FIBER

Also available Loading-Unloading System, an efficient machine integration for unattended work.

FIBERLASER COLLECTION

Fiber Laser

FIBERLASER COLLECTION

Press Brakes

EVOLUTA

Hydraulic Press Brake EVOLUTA.
The top of Warcom production for press brakes. Suitable for
countless different bending procedures.

BENDING COLLECTION

Press Brakes

EVOLUTA

EVOLUTA with Bend-Master Automatic Tool Change, Warcom solution for automated bending set-up.

BENDING COLLECTION

Press Brakes

DINAMICA

Hydraulic Press Brake DINAMICA.

Characterized by an elegant design with attention to every detail.

It's the ideal machine for contractors, service centers, industrial carpentries and for anyone looking for high productivity and quality.

BENDING COLLECTION

Press Brakes

Warcom

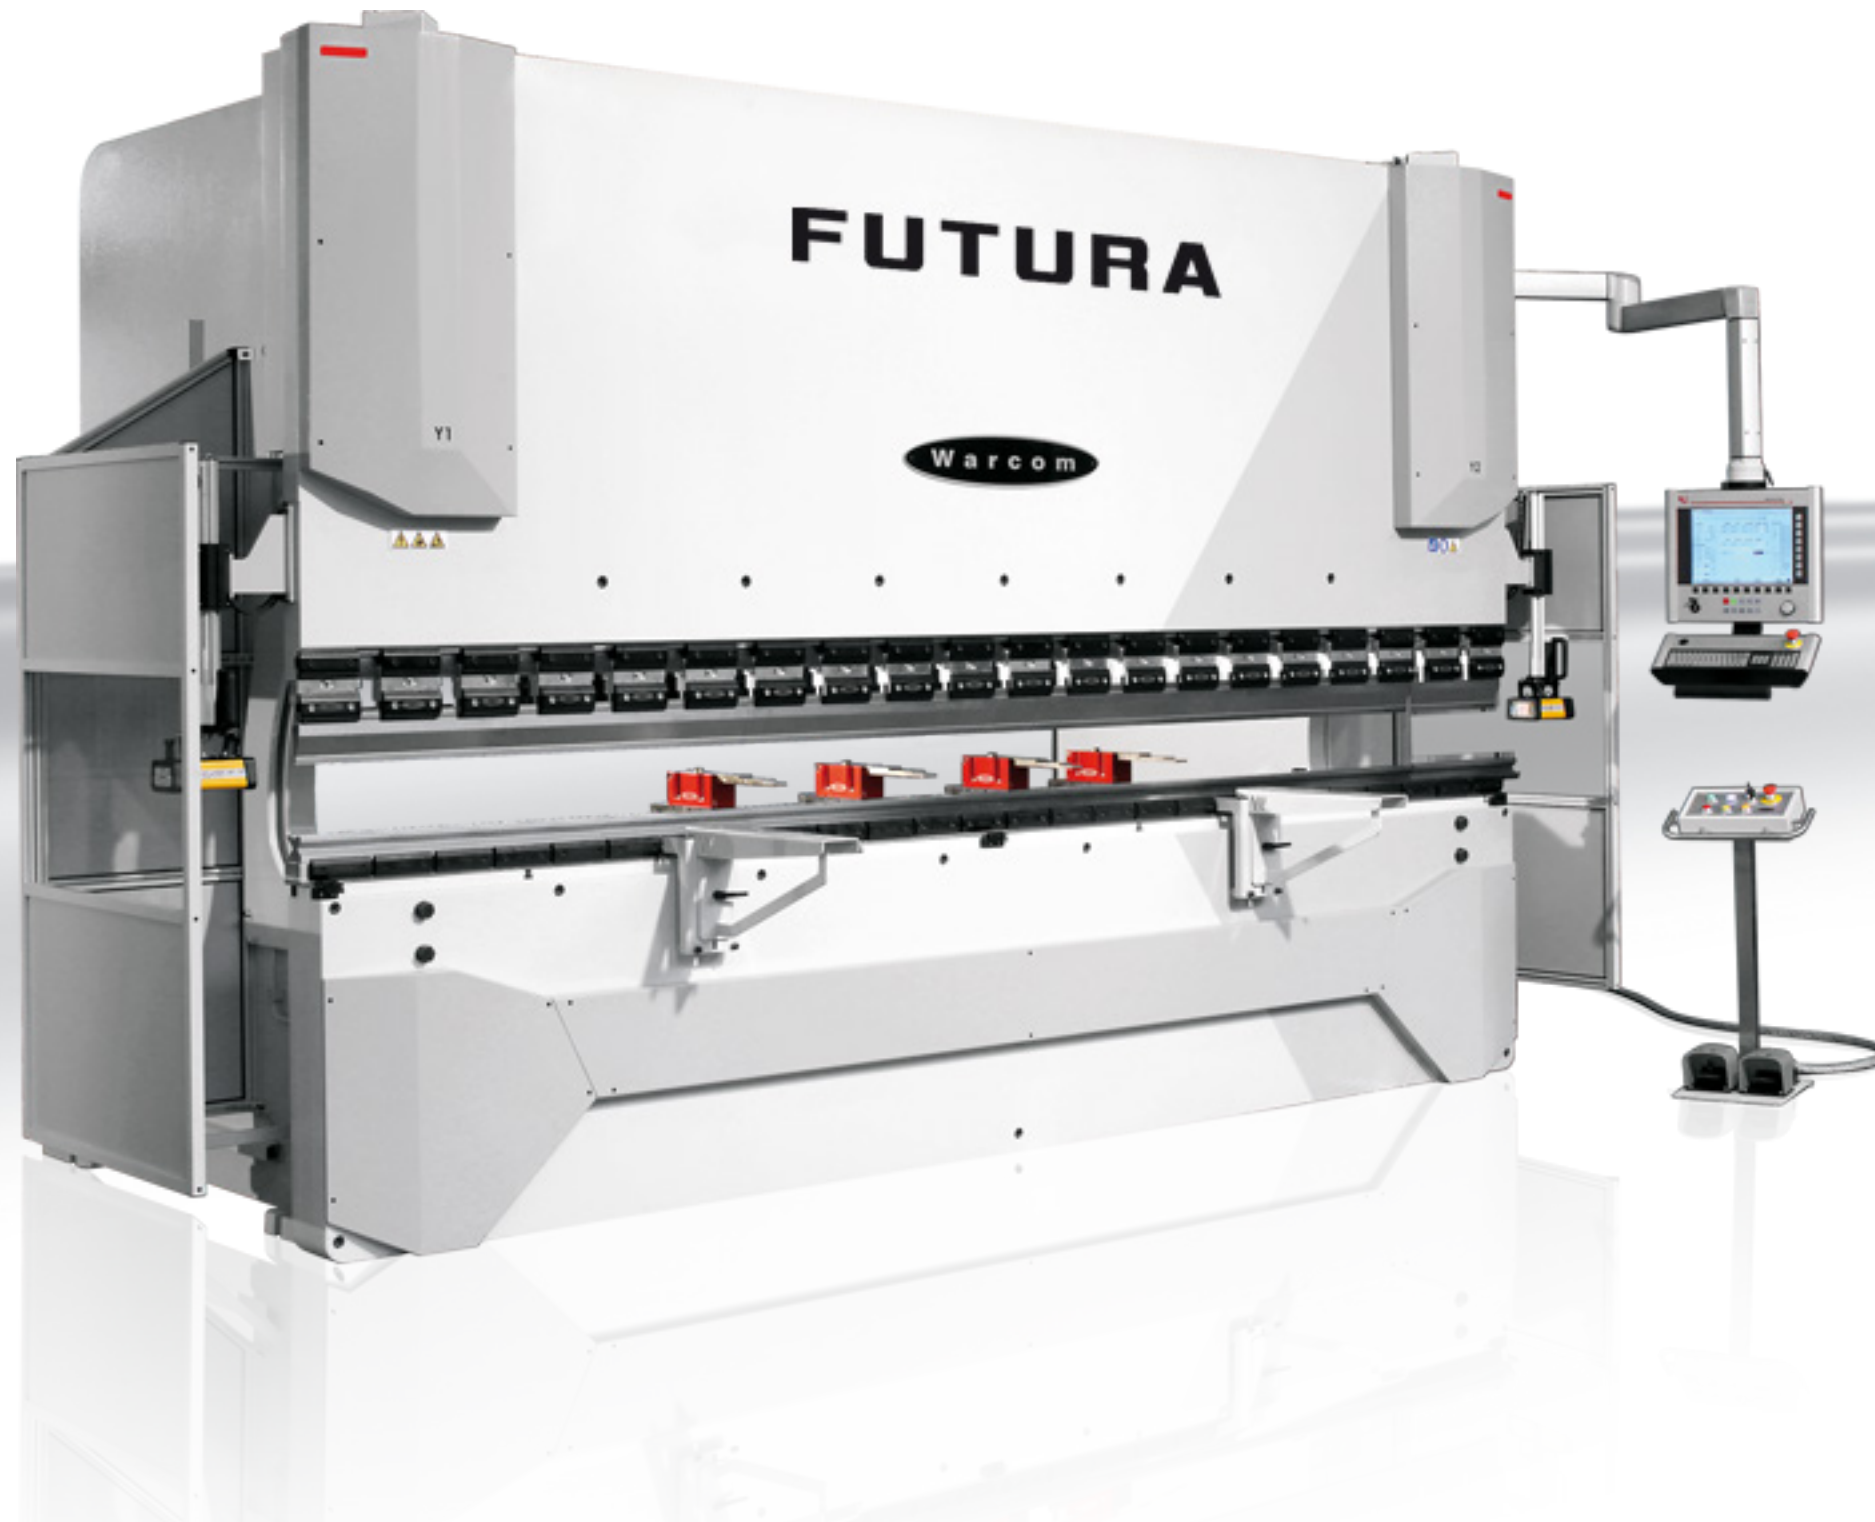

BENDING COLLECTION

Press Brakes

FUTURA

Hydraulic Press Brake FUTURA.
The most customizable Warcom Press Brake, available up to
1500 tons bending force and 10 m length.

BENDING COLLECTION

Press Brakes

Warcom

BENDING COLLECTION

Electric Press Brakes

LOGICA

Electric Press Brake LOGICA.
The fastest press brake in Warcom. Reliable and precise.
The best choice for high precision bends with the best repeatability.

BENDING COLLECTION

Electric Press Brakes

BENDING COLLECTION

Plasma Cutting

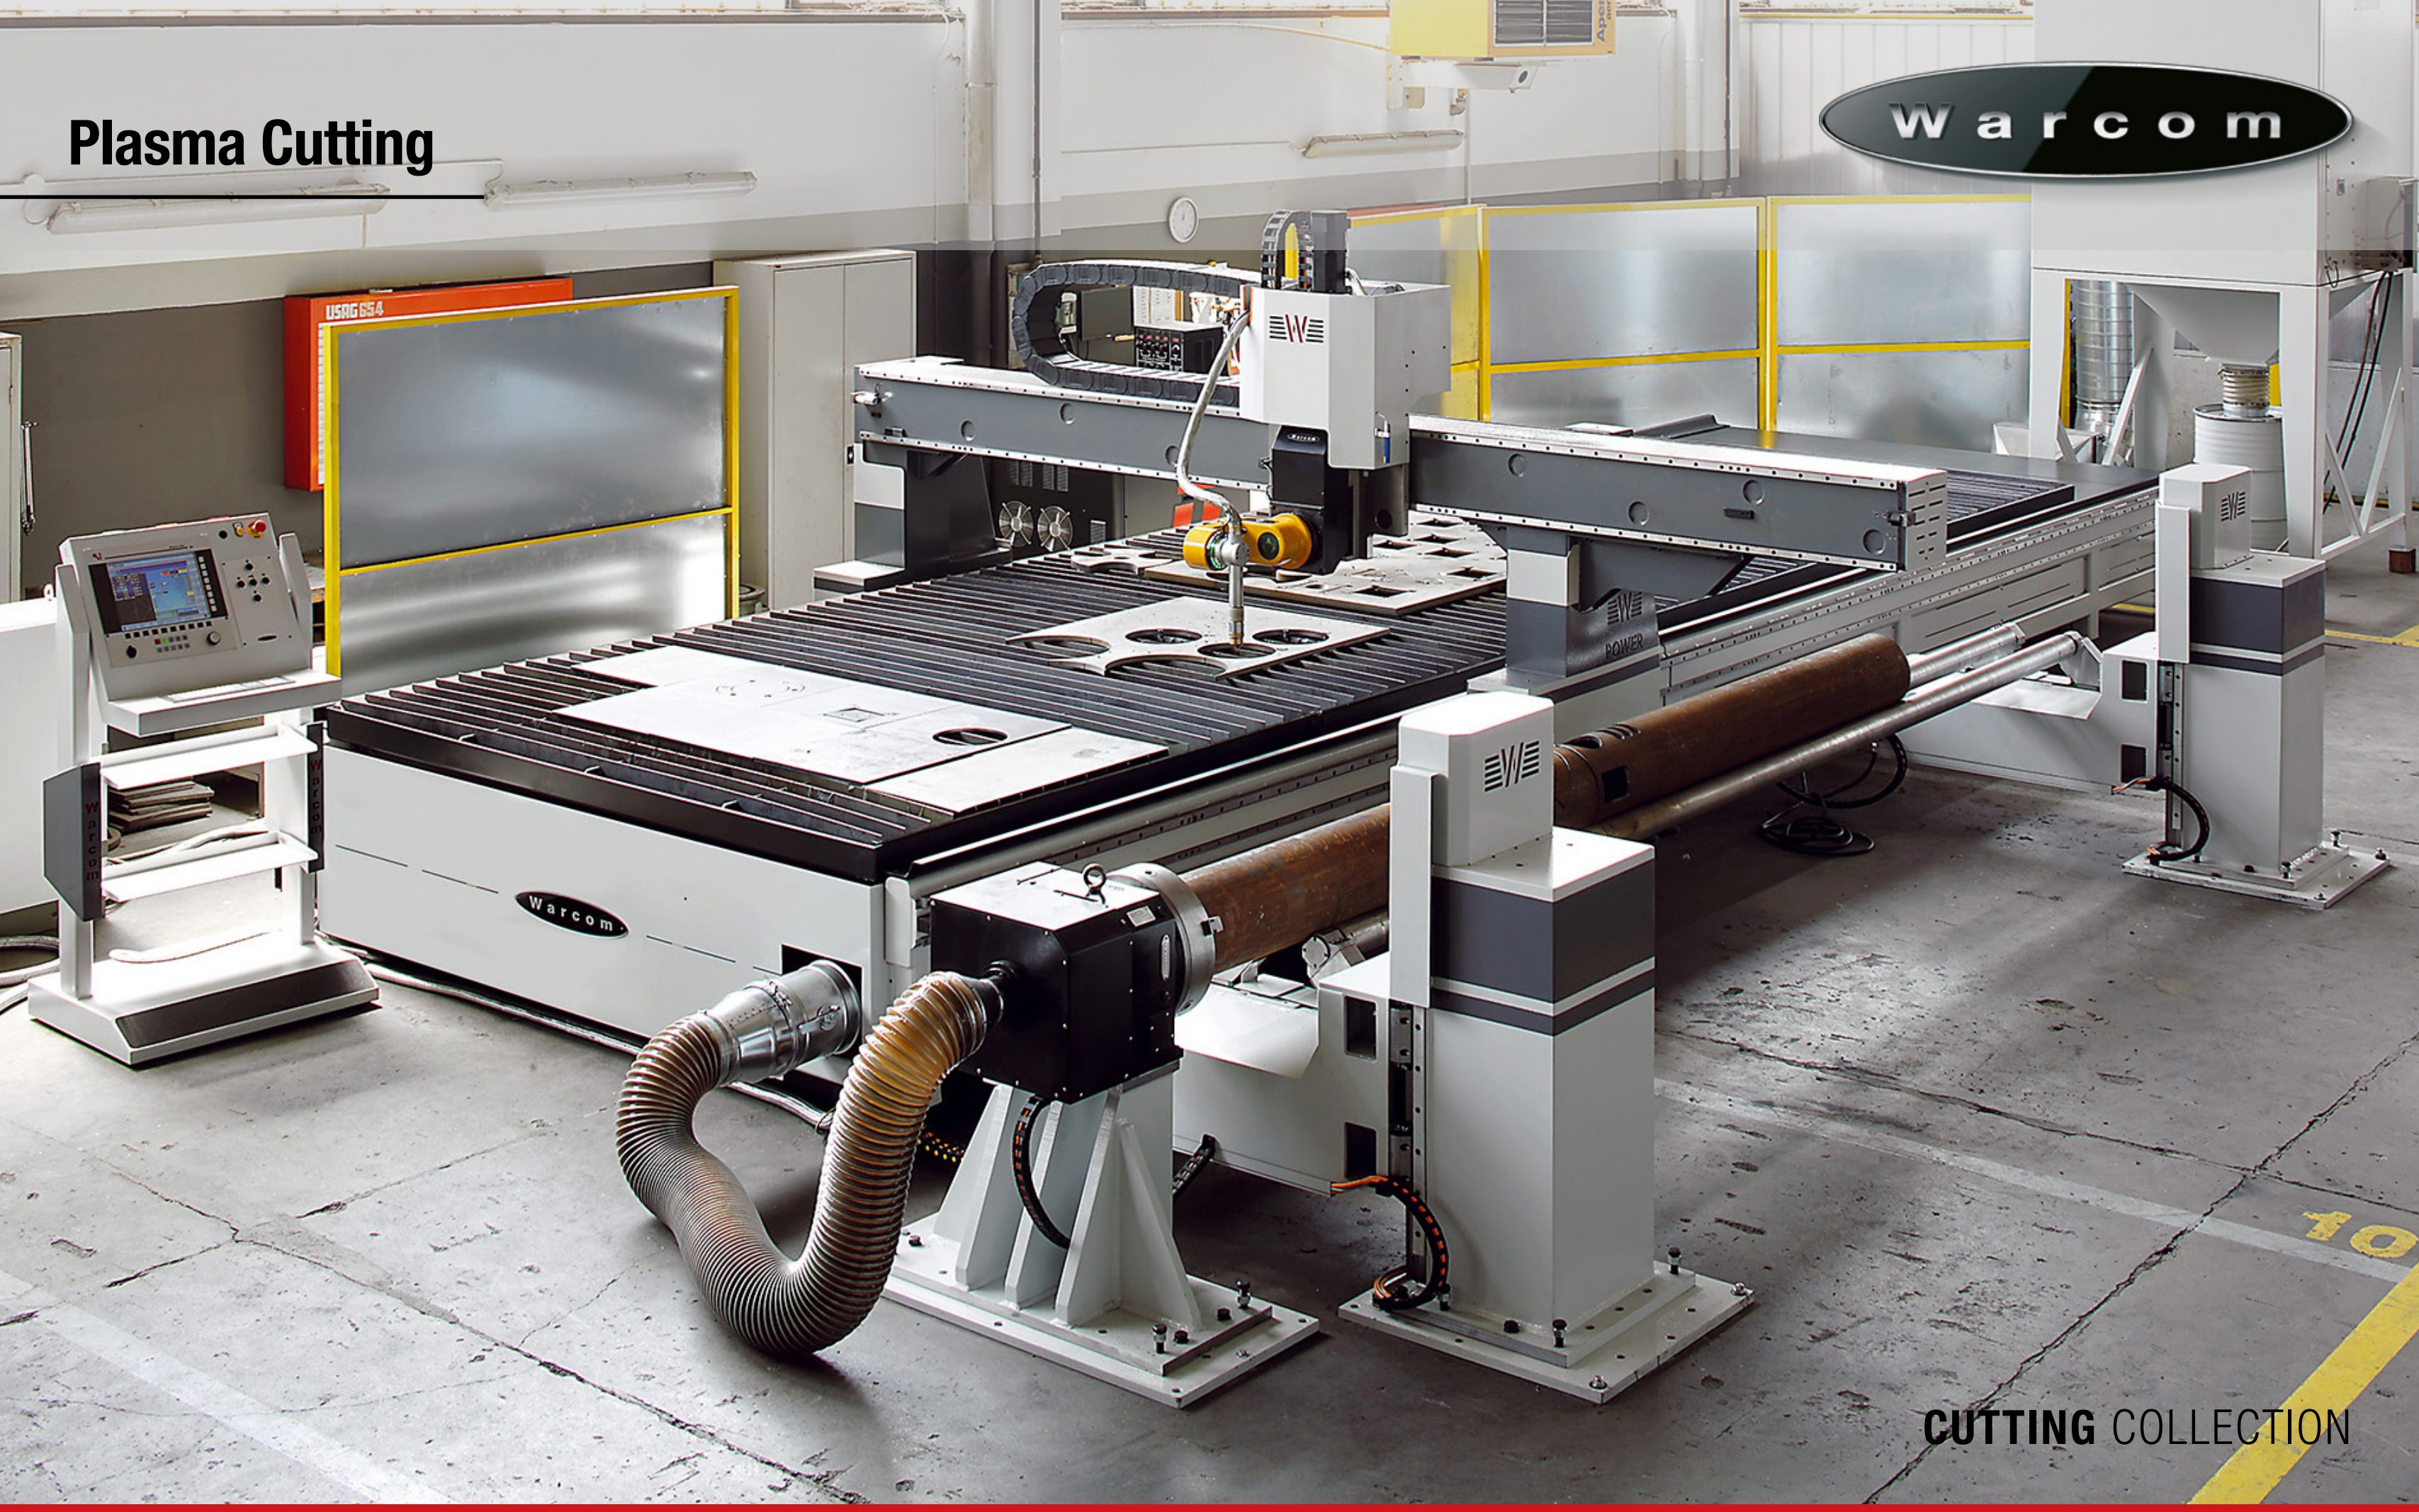

W-POWER is a Plasma Cutting System with a very good quality/price ratio and it's suitable for medium-heavy steel metal sheet working.

CUTTING COLLECTION

Plasma Cutting

Warcom

CUTTING COLLECTION

Guillotine Shears

MAXIMA

MAXIMA is a reliable and user-friendly Hydraulic Guillotine Shear. Its long service, almost 20 years, is a demonstration of its good quality and reliability.
