

POWERMASTER:

The Supertec POWERMASTER CNC series is designed for grinding round ("A" SERIES) and non-round ("B" SERIES) complex parts in a single setup as well as small and large batch production. Distances of 24" and 40" between centers with a swing of 12.6" are offered. All PMG CNC models come equipped with an automatic swiveling B-axis on the wheelhead and can perform OD, Plunge, OD traverse, shoulder taper, and end-face grinding. A separate ID spindle allows for accurate ID grinding during the same set-up. The FANUC CNC control on the "B" SERIES allows the grinder to move the C-axis and X-axis simultaneously in order to grind non-round workpieces such as eccentric shafts, cams or polygonal parts. These machines are especially suitable for the automotive, machine tool, and aerospace, hydraulic, pneumatic and electric motor industries. The reinforced ribbed box-type base is made of Meehanite cast-iron to ensure high rigidity and stability of the machine. A combination of high precision hand scraped Turcite-B coated V and flat guideways, and a hydrodynamic lubrication system guarantee a long lifetime of accuracy and dependability.

X-axis is driven by high precision ballscrew and servo motor with close-loop system (Absolute Inductive scale with 1μ resolution and ±5μ grating accuracy), and it can be moved simultaneously with the rotation of the C-axis for grinding non-round or eccentric parts, shown in following illustrations.

**TURRET WHEEL HEAD (B-axis)**

The universal wheel head has been designed for OD plunge, OD angular and ID grinding in a single clamping.

- Roller Gear Index Table, and automatic swivel by servo motor
- Automatic swiveling in any position range from 35°CCW to 195°CW
- B-axis servo motor output 2.5 kw
- OD spindle motor output 5HP (opt. 7.5HP)
- High-Frequency Built-In ID Spindle.
- Grinding wheel (LH) 16"x 2"x 5"
- Grinding wheel (RH) 14"x 1½"x 5"
- X-axis FANUC servo motor output 1.6 kw (2.7 kw for B type)
- Hydrodynamic lubrication system
- Safety Wheel Guards design
- Variable wheel spindle speed controlled by default program, ensure constant peripheral speed of grinding wheel

WORK HEAD

- Variable Spindle speed (controlled by program) range from 30 to 350 rpm
- C-axis Interpolation
- Center taper MT4 (opt. MT5) for grinding round (A Type)
- A2-5 spindle for grinding Non-round (B Type)
- Servo motor output 1.5 kw (3 kw for B type)

**● C-AXIS (B SERIES)**

The B SERIES workhead is equipped with a "C" axis spindle (A2-5) which allows the operator to program and grind non-round workpieces such as CAM shafts or crank shafts.

**● HIGH-FREQUENCY ID SPINDLE**

The PMG series incorporates a water-cooled high-frequency spindle (Max. rotation speed 40000 rpm) with a built-in motor for higher torque and lower resonance performance. This design also allows for a more compact wheelhead design.

● LINEAR SCALE AND LINEAR GUIDEWAYS

Linear guideways and linear absolute inductive scales are used in the X-axis for smoother movement and more accurate positioning.

- The Fanuc control operates 3 or 4 axes. "A" SERIES: X/Z/B (3-axis) controlled by FANUC. "B" SERIES: X/Z/B/C (4-axis) controlled by FANUC.

● HYDRAULIC TAILSTOCK WITH FOOT PEDAL

The hydraulic tailstock is operated by a foot pedal which allows the operator to use both hands when loading and unloading the workpiece.

● OPI-OD GRINDING

● OPII-CAM GRINDING

● NON-ROUND WORKPIECE GRINDING OPERATIONS

● OPIII-TAPER GRINDING

● OPIV-ID GRINDING

FEATURES OF GRINDMASTER 35/45/80 CNC

The GRINDMASTER SERIES are 3-axis complex CNC ID/OD grinders. The GRINDMASTER I/I and I/O models use a FANUC CNC to control the workhead (X-axis), ID or OD wheelhead (Y-axis) and ID wheelhead (Z-axis). The GRINDMASTER I/I/O model uses a FANUC CNC to control the workhead (X-axis), ID and OD wheelhead (Y-axis), swivel axis (B-axis) and ID wheelhead (Z-axis).

With just a single chucking action the GRINDMASTER SERIES can perform complex and precision grinding operations such as internal diameter, outside diameter, shoulder grinding taper grinding and end-face grinding. The ID and OD wheelhead (Y-axis) has a programmable automatic swivel function allowing for a smooth transition from one grinding function to another during a single program. It is the perfect solution for grinding complex parts in single piece and small batch production runs. With the incorporation of an automatic loading / unloading system the GRINDMASTER SERIES becomes ideal for large batch production, saving valuable time and cutting total cycle times by as much as 60%.

High precision roller type linear guideways on the X, Y and Z axes ensure superior positioning accuracy of all 3 axes. Superior concentricity, roundness accuracies and finishes can be achieved easily with the use of the GRINDMASTER SERIES making it the ideal grinder for the automotive, machine tool, aerospace, hydraulic, pneumatic, and electric motor industries.

B-axis is driven by Fanuc servo motor.

The reinforced ribbed box-type machine base is made of high strength Meehanite cast-iron to ensure the high rigidity and stability of the machine. A full enclosure with a large sliding door provides ample space for calibration, set-up, part loading/unloading, and grinding operations. The GRINDMASTER SERIES are made to stringent CE certification standards. The CAD/CAM modularized design of the GRINDMASTER SERIES ensures the high accuracy performance of the machine. A closed loop linear scale feedback system on the X-axis ensures the high precision required for grinding operations. Further more a touch probe can be added to improve accuracy even more.

ADVANTAGES

I/I-Type :

Y/Z-axis Dual Independent Wheel Head Design

- ◆ I/I-type : Z-axis equipped ID wheel head;
Y-axis equipped ID wheel head
- ◆ I/O-type : Z-axis equipped ID wheel head;
Y-axis equipped OD wheel head
- ◆ I/I/O-type : Z-axis equipped ID wheel head;
Y-axis equipped ID/OD wheel head
- B-axis automatic swivel by servo motor
- B-axis servo motor output 1.2 kw
- ◆ ID Spindle Motor Output 3 HP (2P)
- ◆ Grinding wheel (ID) 1.5" x 1.5" x 3/8"
- ◆ OD Spindle Motor Output 5 HP
- ◆ Grinding wheel (OD) 16" x 2" x 5"
- ◆ Y/Z-axis Fanuc Servo Motor Output 1.8 kw

I/O-Type :

X-axis Work Head

I/I/O-Type : GM-80 ONLY

- ◆ Standard 6" 3-Jaw Hydraulic Chuck (GM-35/45)
- ◆ Standard 8" 3-Jaw Hydraulic Chuck (GM-80)
- ◆ Manual Swivel
- ◆ Swing Over Diameter :
-Grindmaster 35: 11.8"
-Grindmaster 45: 17.7"
-Grindmaster 80 : 31.5"
- ◆ Spindle Servo Motor Output 3kw
- ◆ X-axis Fanuc Servo Motor Output 1.8 kw

Grinding Applications (I/I Type)

Grinding Applications (I/O Type)

Grinding Applications I/I/O Type GM-80 Only

Standard Accessories

- ◆ FANUC CNC Controller
- ◆ Touch Probe (OD)
- ◆ Coolant System with Magnetic Separator & Paper Filter
- ◆ 6" (GM-35/45)/8" (GM-80) 3-Jaw Hydraulic Chuck
- ◆ Full-Enclosure Cover with Oil and Mist Separator
- ◆ Internal Grinding Spindles : 8000/15000/20000/30000 rpm
- ◆ Work Head Spindle Nose : A2-5(GM-35/45)/A2-6(GM-80)/MT4(PMG)

Optional Accessories

- ◆ Auto Sizing Device
- ◆ Wheel Auto-Balancing Device
- ◆ Y/Z-axis Linear Scales
- ◆ Work Head Spindle Nose Upgrade : A2-6(GM-35/45)/A2-8(GM-80)/MT5(PMG)
- ◆ 8" (GM-35/45)/10" (GM-80) 3-Jaw Hydraulic Chuck
- ◆ Internal Grinding Spindles : 8000/15000/20000/30000 rpm

MODEL		PMG-60/100CNC(A)		PMG-60/100CNC(B)	
CAPACITY	Swing Over Table	Ø14"
